

**MEROMORPHIC FUNCTIONS AND THEIR DERIVATIVES:
EQUIVALENCE OF NORMS**

KONSTANTIN DYAKONOV
(ICREA/UB)

Given an inner function I , let K_I^p stand for the corresponding star-invariant subspace of the Hardy space H^p (on the line). A criterion is found for the differentiation operator d/dx to map K_I^p isomorphically onto its image in H^p .
